About This Game

Dr.Green is a 2D retro, arcade, action platformer, inspired by games like Megaman and Ninja Senki. Take control of the orphan Dr.Green, on his mission to save the forest and take revenge on the evil forces trying to destroy it. Dr.Green is the debut game of Indie developer & Pixel artist Johan Aronsson and is both an environmental statement and a captivating story of a young child uncovering his past.

Story

One day Dr.Green awakes to find his home under attack. The forest he grew up in was under siege by workers. Their sole intent to destroy the natural beauty of his home for profit. Dr.Green, inspired by their actions makes a stand against them in order to stop the destruction and save his home. Embarking upon this journey will take Dr.Green to places beyond the comfort of his home and leads him to discover mysterious secrets surrounding his past.

Dr.Green is about fighting for what you believe in, even if things seem hopeless.

Gameplay

In Dr.Green you will experience a classic, arcade inspired gameplay. Taking control over the orphan Dr.Green you use your pea gun, loaded with powerful seeds to take down your enemies. Since Dr.Green was raised in the forest and spent a lot of time with its inhabitants he has learned the ability to double jump to be able to keep up. Double jump will prove to be a good quality on his journey and a key to progress.

Features

- Controller Support (Analog & D-pad)
- Rebindable keys for keyboard
- Colourful pixel art graphics
- Captivating double twisted story
- Chiptune inspired soundtrack

Dr.Green have 8 levels in total, each guarded by a boss, more or less important to the story. All levels have a new element or a new enemy introduced, carefully created to fit the area they are in and often inspired by previous enemies's behaviour to give you a nice and smooth, but still, challenging experience.

The game is not created in the mind of giving the player another game to blast through. I wanted to maintain the horrible, yet enchanting difficulty old platformers like Megaman had. Rewarding the player for getting to know the enemy, their movements, how the levels work, finding the timers. The game is constructed in a way that everytime you game over, you do it knowing something new about the obstacle and get you closer to the finish line.

The gameplay is not always entierly linear and there are levels that provide alternative ways to mix things up a little and also encourage the player to try other ways to gain time or find more score.

Throughout the level you will find seeds that you can collect, these will give you score. You will also find caged animals, that award you when freed. Depending on your final score, you will get different endings.

Title: Dr.Green

"Super Catchy with your favorite Specimen chases without dieing!"-GWL292 my fav is dum loopy thing 2015V10. "Due to limited budgets we are Releasing the Game in this early state"

Very early and very rough. You do however get the idea of what it is about. You pretty much get what you see in the video now, and there is a tutorial when you start. It works on Linux but only in windowed mode because of the Unity bug. I was not able to get it in fullscreen after starting it.

It's worth the price as long as it keeps growing. The dev seems to be honest about expectations and that's important in my world. I actually think this could be a game for kids too since it is kinda easy to get started and understand, but it needs more content ofc.. LIKED:

more weapons, armour, vehicle and enemy variety

DISLIKED:

difficulty is all over the place, one minute you can be breezing through one missions and the next you will have a massive difficulty spike.

Most weapons are completely ineffective and have a very small ammo capacity, leaving you constantly scrabbling for dropped ammo in the middle of one of the many defend objectives.

Levels are shorter than the first game and makes the story feel delivered in a very stacarto manner as the next mission starts exactly where the last one left off.

Overall:

worth it if you really love the halo franchise otherwise play one of the many better games available. its a clicker what can I say. Ok, how to I phrase this carefully...

THIS GAME IS MOTHER ♥♥♥♥ING AWSOME!

Ignore the butthurt kids, a game allways has a few bugs at launch, I guarantee that they will be ironed out within a few patches

It's not a highly complex game, and yet, It's the best version of Pang i ever played, and the old arcade theme is a great icing on the cake. Well animated, simple yet solid gameplay, cool music and cool mood overall. A great way to waste a day! ^^ . fun for a quick brawl; really enjoyed the sword and sheild, but each weapon plays just a bit differently.

was only allowed to play arcade mode; it seems like the challenge mode is online only and there's really no one playing this.

think of it like a quick arcade brawl... pretty entertaining for about 20 minutes, but still worth the price. quality shiz here.. I played this game quite a while ago, so if there have been any updates that negate my review, I'm not aware of them and I'm sorry.

I couldn't figure anything out. I couldn't get past the first level and after almost an hour of trying to find out what I was supposed to do in the first level, I gave up and tried to find a walkthrough. There were no walkthroughs available, and I really didn't care enough to try to figure out more, so I just had to refund the game.. the funniest \u2665\u2665\u2665\u2665ing game just kicking a small child and having them go flying though a window is the best. I would like to say that I like the game. If you like arcady racers you will enjoy it. However, I have just bought flashout 2 so that a friend and I would have a game to play together. I am currently using an XBOX 360 controller to play the game. As I traverse the menu's they can be a bit clunky and sometimes it selects the wrong thing. I have no way of inviting my friend to join my match. We queued together several times and it was working great. Now, we select to join a match and we just sit for 50 seconds without our computers finding eachother. This is a real problem for me considering the reason I bought it was for the multiplayer aspect. I hope they are able to address the issue soon.. This is a terrible game, NOTHING is explained, you just walk around doing random♥♥♥♥♥♥with no idea where to go, some NPCs give you quests but the freeroaming is really abhorrent. I've seen way better games made by RPGMaker.
